

Envelope Making Machine

Product Technical Sourcing Proposal
Paper & Pulp Equipment

HSKD-1000G

Real supplier reference image. Final brand, model and appearance depend on selected quotation.

RECOMMENDED SUPPLY CONFIGURATION

Select the minimum practical configuration for Envelope Making Machine only after confirming the actual duty, capacity, inputs, output quality, utilities, site conditions and acceptance test.

Product Overview, Applications & Primary Use

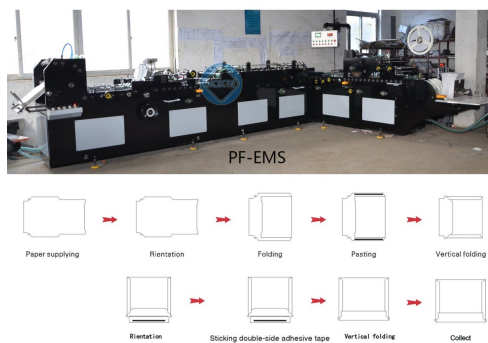

Cutting, folding, hot glue and drying stages for high-volume office and bespoke envelopes.

Technical sourcing approach

- Confirm the real operating duty and site conditions before comparing models.
- Compare supplier quotations against one common technical specification.
- Require a factory test, drawings, manuals and a critical-spares list.
- Plan freight, inspection, installation interfaces and after-sales support before purchase.

Applications and primary use

- Specific industrial purpose: Cutting, folding, hot glue and drying stages for high-volume office and bespoke envelopes.
- New installation sized to confirmed demand rather than maximum catalogue capacity.
- Replacement or expansion after checking physical, utility and control compatibility.
- Economical Afghan implementation using local installation and fabrication where safe.

Product-Specific Technical Specification

Selection parameter	Required function / value	Buyer or site input
Raw material	Handle the confirmed pulp, recovered paper or roll stock	Provide grade and moisture
Finished product	Meet width, basis weight and quality	Provide sample/specification
Capacity	Stable daily or hourly output	State target and shifts
Web width/speed	Match product range without unstable operation	List launch sizes
Water/steam/air	Fit available utilities and treatment	Provide utility data
Drive and controls	Serviceable coordinated speed control	State automation level
Trim/waste	Control broke, dust and wastewater	Describe disposal/recovery plan
Testing	Trial intended raw material and product	Define acceptance quality

Buyer checklist and quotation requirements

- Describe the exact process, material and intended operating duty.
- State required capacity, operating hours and acceptable output quality.
- Provide product samples, drawings or technical data where applicable.
- Confirm voltage, frequency and all available utilities.
- Provide factory layout, access and environmental conditions.
- Separate equipment, tooling, freight, installation and optional items.
- Require drawings, running test, acceptance criteria and critical spares before shipment.

Final technical parameters, included accessories and acceptance criteria must be confirmed in the supplier quotation, test report and purchase contract. Do not purchase from photographs alone.

Indicative Product Pricing & Supply Guide

PRODUCT QUOTATION BASIS

Final pricing for Envelope Making Machine follows the confirmed technical specification, required rating or capacity, included accessories, inspection scope, delivery terms and destination.

Supply component	Indicative planning range	Quotation basis
Main equipment	US\$3k-30k	Minimum configuration for confirmed duty
Essential tooling and accessories	US\$1k-8k	Only launch requirements
Freight and clearance	US\$2k-10k	Shipment based on complete scope
Installation, testing and spares	US\$1k-6k	Local execution where practical
Low-entry project total	US\$7k-54k	Final price follows confirmed specification

Technical sourcing and delivery process

Phase 1	Define requirement and request comparable quotations - 1 to 2 weeks
Phase 2	Technical clarification, negotiation and inspection plan - 1 to 3 weeks
Phase 3	Manufacture or refurbishment - typically 3 to 10 weeks
Phase 4	Shipping and customs clearance - typically 3 to 7 weeks
Phase 5	Local installation, training and trial operation - 1 to 3 weeks

These are non-binding planning ranges. Final product price and delivered cost depend on the confirmed specification, accessories, inspection, freight, customs, exchange rate and destination.

Sanaatchi Support & Contact

- Supplier search using one confirmed product specification
- Side-by-side technical and commercial quotation comparison
- Factory test, documentation and pre-shipment inspection coordination
- Lowest-cost practical logistics planning from China to Afghanistan
- Installation-interface, spare-parts and after-sales coordination
